

Truphone Adds 11 New Nokia Devices To Its Portfolio

26 Nokia devices now Truphone compatible

London, 24 June 2009 – Truphone has added 11 additional Nokia handsets to the list of devices compatible with Truphone and whose owners can now ring up big savings by taking advantage of Truphone’s broad range of calling plans and services.

“We first introduced Truphone on a Nokia device so we are pleased to be able to increase the range of compatible Nokia devices and extend our loyal Nokia customer base further,” said Truphone CEO Geraldine Wilson. “Nokia is still the largest mobile handset manufacturer in the world so ensuring that we’re on as many of these devices as possible means more and more people can take advantage of Truphone’s fantastic rates to make international calls.”

With the addition of the 11 new handsets, Truphone is now compatible on 26* Nokia devices. Of those, software for 14 of the Truphone-compatible devices can now be downloaded from Nokia’s new Ovi store, with the software for 11 of the remaining 12 new devices to be added to the Ovi store soon.

In addition to the Ovi Store the Truphone application is also available for all 26 Nokia devices as an SMS over the air (OTA) download from the Truphone web site, www.truphone.com, and will always parallel the applications available via the Ovi store. The Truphone website will also include applications for other Nokia devices not currently available via Ovi, as well as the other supported mobile platforms.

The new Truphone-enabled Nokia devices are:

- N96
- N78
- N85 (also VoIP enabled)
- N79 (also VoIP enabled)
- 5630 (also VoIP enabled)
- 5800
- 5320
- 6210
- 6220
- 6650
- E63

After downloading and installing the Truphone application to their handsets, Nokia device owners will be able to take advantage of two calling plan options:

- Truphone Anywhere: Calls made when customers are connected to local wireless networks are handled as local calls and then passed on to the Truphone network, from where they are routed at Truphone's fantastic rates to landline and mobile phones worldwide. This service is intended for use in the user's home country as savings cannot be guaranteed abroad.
- Truphone Wi-Fi calling: Calls made when customers are in accessible Wi-Fi hotspots anywhere in the world, can be made for free to other Truphone users and at Truphone's fantastic rates to landline and mobile phones worldwide.

All of the new handsets are Truphone Anywhere capable, and in addition, three of the handsets, the N85, N79 and 5630, are also compatible with the original Truphone Wi-Fi calling service, hailing back to Truphone's origin as the first Mobile VoIP service available on Nokia N- and E-series devices.

This means that when customers are connected to a Wi-Fi network, a call to another Truphone customer is completely free and also means they can use a Nokia handset as an alternative, inexpensive roaming solution if they choose to only make calls when connected to a Wi-Fi network when abroad or anywhere.

With Truphone Anywhere, everyone can save money when making international calls. It's simple: International calls dialled on a Truphone Anywhere enabled handset are connected as local calls to the Truphone network, then routed to their destinations at Truphone's low rates. This means that for the price of local calls, which are often bundled in an operator's monthly package, customers can make calls to other Truphone users for free or to landlines and mobiles around the world for as little as 1.5p per minute.

About Truphone

Founded in 2006, Truphone is a global mobile communications provider in the business of innovating how people converse in our globally connected world. As the industry's first mobile Internet operator, the company makes it easy and affordable for users all over the world to keep in touch with friends, family and business contacts overseas or whilst roaming. Truphone is the trading name of Software Cellular Network (SCN). SCN is privately owned, funded by both venture capital investment and angel investors.

Important information

Truphone is not a replacement for an ordinary telephone service and emergency calls cannot be made using Truphone. However Truphone does not prevent emergency calls being made via a handset's normal cellular service provider. Truphone cannot advise on the legality of VoIP services in specific territories or jurisdictions. It is the user's responsibility to confirm that use of the Truphone VoIP software and service is permitted in the location in which they use it.

Nokia, E50-E99, Eseries and N70-N99 are trademarks or registered trademarks of Nokia Corporation. Wi-Fi is a registered trademark of the Wi-Fi Alliance. Truphone is a trademark of Software Cellular Network Ltd. All other brands, product names, company names, trademarks and service marks are the properties of their respective owners.
